# Company Profile

Serving  
excellence,  
since 1993

**Eta Service** is an engineering company specialized in **designing, manufacturing and marketing machines and tools for steel tubes cold working.**

Eta was established in 1993, on 2004 its founders decided to create Eta Service in order to strengthen their more-than-ten-year-old experience in the field of car exhaust-pipes manufacturing.

In 2013 Eta was taken over by **Fema Srl**, becoming part of the group together with **Dieffe Srl**, a leading company in industrial automation.

The synergies and know-how developed, our market-oriented attitude and our engagement with customer's satisfaction have allowed the Company to **achieve excellent quality standards.**

The commercial department constantly follows our customers in the pre and after-sale stage, thus guaranteeing an efficient technical support.
