# WINE & WATER

WINE DEVELOPS AND MATURES IN THE BOTTLE, BUT EVEN A RIPE WINE CAN BENEFIT FROM AERATION BEFORE SERVING. YOUNG RED WINES IN PARTICULAR CAN BE SOMEWHAT UNAPPROACHABLE, BUT AERATION TONES DOWN THE WINE'S ACIDITY AND BITTERNESS, MAKING IT ROUNDER AND MORE ACCOMMODATING, AS ITS BOUQUET AND AROMA UNFOLD BEFORE THE WINE IS POURED.

TRADITIONAL AERATION INVOLVES POURING THE WINE INTO A CARAFE AND ALLOWING IT TO STAND FOR A COUPLE OF HOURS OR MORE. THIS REQUIRES PLANNING, PLENTY OF TIME AND PATIENCE. DO YOU REALLY WANT TO WAIT THAT LONG?

## DO YOU THINK THAT ONLY RED WINE NEEDS TO BE AERATED? THEN IT MIGHT BE TIME TO THINK AGAIN!

We hardly need to tell you that red wine benefits from aeration. But did you know that aeration does precisely the same for white wine? The aroma and bouquet unfold as the wine's finish improves and any bitter aftertaste fades. Of course, you can aerate your wine in the traditional way: By pouring it into a carafe and allowing it to stand for some time. This just requires time and patience – and the ability to keep the white wine chilled as it aerates.

### READY TO DRINK, CHILLED WHITE WINE IN JUST A FEW MINUTES

New Norm CoolBreather brings innovation to wine. Aeration occurs as you pour the wine from the bottle to the carafe through the unique pour spout. Forget about uncorking wine long before drinking. And you keep your wine chilled longer with CoolBreather. Keep the practical coolstick in the freezer and place it in the 1-litre carafe when you need it. If the wine is a bit too warm, you can also chill it with the CoolBreather. The wine will become chilled quicker if you occasionally swirl it around in the carafe.

The carafe's clean lines are inspired by the wine bottle and you can use the carafe to serve the wine – it does not have to be poured back into the original wine bottle. Just place the lid on the carafe if you want to save the rest. You can also use the CoolBreather to chill water and juice. An additional tip: Many red wines are also better slightly chilled than at room temperature. The CoolBreather is well-suited to aerate and chill your red wine.

MENU'S WINE BREATHER CARAFE a world-class design with a unique double wine decanting process, which provides exceptional decantation, combined with a beautiful visual experience that impresses both connoisseurs and wine lovers. This is pure innovation – designed by Norm for Menu.

TURN AROUND, AERATE AND SERVE

The actual aeration process is untraditional and worth seeing, so your guests will probably enjoy witnessing the wine breather in action. The bottle is placed on the table and the carafe is attached to the bottleneck. Then, the bottle is carefully turned over and the wine flows into the carafe.

The Wine Breather spreads the wine so that it splashes through the neck of the carafe and flows down its sides, providing the maximum possible surface area. The wine can be served in the stylish carafe, but if you prefer to have the original bottle on the table, just turn the carafe over again and the wine flows back into the bottle!

## COLORS

To highlight the importance of a healthy  
homemade lunch we are now reinventing the  
healthy lunch experience and giving the classic  
lunch box a Scandinavian makeover.

The Cool Lunch is featured in strong colors with  
dominant zippers and a small cooling element  
keeps food and drinks cold and fresh. A clever  
handle with velcro allows the Cool Lunch to be  
mounted with ease on a golf bag, a back-pack or  
over the handlebars of any bike.

# OUTDOOR SEASON

LIKE A NAIL IN A PLANK, THAT'S HOW SIMPLE IT WAS FOR THE VIKINGS TO PLACE THEIR CANDLES. ON A WALL, A DOOR FRAME, A TABLETOP OR BEDPOST. AND MAYBE EVEN ON A LONGSHIP? A SIMPLE PIECE OF FLAT IRON, FORGED AS A NAIL AT ONE END AND A CANDLESTICK AT THE OTHER WAS ALL IT TOOK.

DESIGN PERNILLE VEA HAS FOUND INSPIRATION IN THE VIKINGS' ROUGH DESIGN AND RECREATED IT FOR MODERN USE. THE PIPE CANDLEHOLDER IS CAST INSTEAD OF FORGED. IT IS CLOSED AT THE BOTTOM AND THE OUTDOOR VERSION FEATURES WINDPROOF GLASS SO THE CANDLES DO NOT BLOW OUT OR IGNITE ANYTHING IF THE FLAME FLICKERS. AND YOU CAN CHOOSE BETWEEN THE VERTICAL AND HORIZONTAL VERSIONS FOR CANDLES OR TEALIGHTS. THE CANDLEHOLDERS OFFER THE SAME SIMPLE FUNCTIONALITY IN BOTH VERSIONS AND YOUR IMAGINATION IS THE LIMIT WHEN IT COMES TO WAYS TO USE THEM.

YOU CAN CREATE YOUR OWN PERSONALISED DESIGN AND EXPLORE THE UNIQUE POSSIBILITIES IN YOUR HOME: DRIVE THE HOLDER INTO A TREE TRUNK OR WOODEN BEAM OUTDOORS WHERE YOU THINK IT IS ATTRACTIVE AND USEFUL, OR INTO A PIECE OF FIREWOOD INDOORS. OR ARE YOU A TRUE VIKING WHO HAMMERS IT INTO A DOOR FRAME OR TABLETOP? ONLY YOU SET THE LIMIT FOR HOW ROUGHLY IT CAN BE USED.

# NEW NORM

"DESIGN SHOULD MEET REAL NEEDS AND PLEASE ALL FIVE SENSES," SAY THE DESIGNERS BEHIND NORM, JONAS BJERRE-POULSEN AND KASPER RØNN. A CLASSIC, RECOGNISABLE SHAPE IS GIVEN AN ORIGINAL TWIST THAT DRAWS ATTENTION. A NEW MATERIAL OR TINY DETAIL GENERATES THE DESIRE TO TOUCH THE PRODUCT, TO SMELL IT AND ENJOY THE SOUND OF IT BEING PLACED UPON THE TABLE. NORM UNITES OPTIMAL FUNCTION WITH AESTHETIC BEAUTY, AND ADDS THAT LITTLE SOMETHING EXTRA THAT GRANTS THE PRODUCT ITS TIMELESS STRENGTH AND SOUL. THEREFORE WE HAVE NAMED THE COLLECTION "NEW NORM".

When you have planned a perfect dinner, carefully selected fresh ingredients, spent hours in the kitchen and designed an attractive table setting, it would be a shame if the cold starter was served lukewarm or the tablecloth was stained by dripping meat juices from the serving dish. To succeed, one needs more than a standard serving dish, but what?

Menu and the designer duo Norm, sat down to solve this problem. The result is a multifunctional serving and carving set, consisting of a melamine tray, a bamboo board, a porcelain dish and a cooling pad, which all can be used individually.

Put the cooling pad in the freezer and afterwards place it between the tray and dish. Suddenly, the serving set is transformed into a cooling tray that can keep desserts, sushi, lunch dishes and starters fresh throughout your meal! Combined with the attractive bamboo board, the tray is converted into a carving set equipped with silicone pads so that it remains steady on the table and in the tray, while a large cut out cross in the middle keeps the roast in place and channels meat juices down in the tray.

The set is developed so it fits together in many ways and in so doing fulfils many of the needs in connection with serving in a modern kitchen. All details have been thought about and the simple, Scandinavian mode of expression hides several functions and refinements. A beautiful and functional gift that will greatly please the lucky recipient.

The dishes are available in three sizes. Each size fits on top of a dish of the same size – but you can also mix the three sizes. Two medium-sized dishes fit on top of the biggest one and two of the smallest on top of the medium-sized ones. In so doing, you can place two dishes on top of each other in which each dish or ingredient is heated separately.

Each corner of the dishes is fitted with a leg of heat-resistant silicone. This means that you can move them directly from the oven to the table – without using trivets. You can also place two dishes on top of each other and place a tea light in the bottom one so you can keep the food warm.

## 03 KNOWLEDGE IN THE BRAIN, WHITE

Karim Rashid is one of the biggest design names of his generation. And Menu has given him free rein to create an entirely unique bookend based on a 3D representation of his own head. Sliced in two with the brain showcased in a different colour, so it takes on a life of its own.

## 01 BARCELONA, BIRD FEEDER

Unique architecture for the birds in your garden. The famous Barcelona Pavilion from 1929, designed by the legendary German architect Mies van der Rohe, provided the inspiration for this meeting place for modern bird life. It also acts as a stylish, sculptural element in the garden. In keeping with van der Rohe's spirit, it exudes geometric simplicity and is made of an extraordinary material: robust and durable acacia wood from sustainable European forests. The feeding table is beneath the roof, where the bird food can be placed on two spikes, while the bird bath sits out in the open.

## 01 CLASSIC GLOBE

Detaches from the base and makes it both fun and easy to plan your next trip abroad, to settle the quiz or to educate the little ones.
