

Stainless steel production

Stainless transport cases

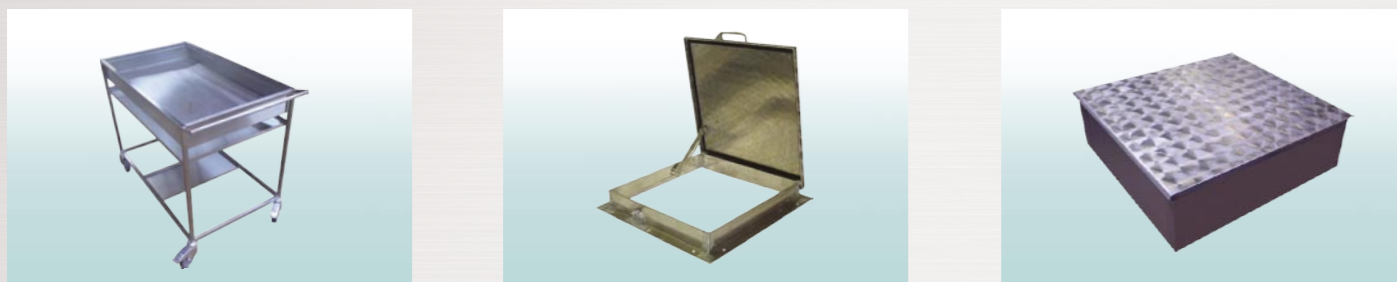

NKP, NKS transport cases and SNK container sets are used for internal plant transport in operations where strict hygienic standards must be observed. They are used for transportation of medical material in hospitals, sanatoriums, senior homes etc.

NKP, NKS transport cases and SNK container set are made of high quality austenitic stainless steel under DIN W.N.r.1.4301.

Other custom-made metal products

Upon agreement with the customer we are able to implement any order in the area of light building constructions, structural elements, equipment and interior accessories of stainless and standard structural steel pursuant to drawings and documentation provided by the customer. We also provide small-lot production and lot production of sheet metal products with desired surface finish by metal-plating, spraying standard paint or pulverized coating.

New project

For our new customer, company ENTRACON, we produce big welded parts for their own products as Harvesters, Forwarders.
